

Applicators certified by Qualisteelcoat : passionate about doing a good job

Place your trust in real experts specialised in the application of coating on steel. By adhering to the Qualisteelcoat label, these professionals have committed themselves to excellence based on compliance, expertise and continuous monitoring.

Compliance

- Working closely with customers to respond perfectly to their needs
- Offering best-in-class services, while keeping well in line with market prices
- Guaranteeing delivery times
- Fully conforming to standards and technical specifications
- Doing everything possible to minimise the environmental impacts of their activities

Expertise

- Devoting their experience and proficiency in their processes to quality
- Choosing just the right technology and techniques to meet all the challenges of the structure
- Keeping up-to-date with technical developments in the market
- Obtaining the Qualisteelcoat label following inspections and tests conforming to European directives

Continuous monitoring

- Daily in-house control: scratch resistance, coating hardness, thickness measurement, adhesion, impact resistance, resistance to boiling water, gloss differences
- Annual inspections and laboratory tests carried out by independent bodies

Go for excellence,
make your structures last a lifetime

Sustained appearance, assured by a label

Enhance your steelwork with a coating finish certified by the Qualisteelcoat label.

This gives you the assurance of ultimate quality : aesthetics and corrosion resistance, a long lifetime, value for money and environmental responsibility.

International Quality Label for Coated Steel

The label of outstanding professionals

Ever since 2007, the International **Qualisteelcoat** quality label has been dedicated to defining good practices for applying (liquid or powder) coating on untreated or galvanized steel.

Rely on the excellence of **the Qualisteelcoat label** to give you peace of mind and enable you to quickly draw up the technical specifications and requirements for implementing your projects.

Anti-corrosion protection

As quality structures will last for years without signs of ageing, have your construction work finished with a coating applied by professionals holding **the Qualisteelcoat label**. Not only will the coating retain its lustre and beauty, but it will infinitely protect the steel from corrosion.

Value for money

A long lifetime means good control of expected operating and maintenance costs. Choosing a coating certified by **Qualisteelcoat** today is a sound investment for the long term.

Environmental responsibility

Qualisteelcoat commits its certified applicators to sustainable development, in terms of both the products used (no solvents or lead) and the industrial process. This guarantees that you will work with experts who always keep pace with the developments in European standards.
